

BIG THINGS HAPPEN IN SMALL TOWNS

August 12, 2013 Sweet Home, OR

Sweet Home RV Center has been awarded the west coast distributorship for ALTFUEL PROPANE CONVERSION KITS FOR SMALL ENGINES. These simple to install kits will inexpensively convert any 1-45 horsepower 4 cycle gas engine to operate on propane fuel.

In the RV Sales and Service business for 22 years, Clarence and Mary Mansfield have been working, fixing and distributing propane on a full time basis, so these conversion kits were a natural fit. Clarence had already converted his 1978 Ford Pick Up to propane so his interest was high.

Servicing Oregon, Washington and California, Sweet Home RV Center will be adding new employees, traveling to trade shows and training others on the benefits of running propane and how to convert their equipment or fleets.

Partnering with Ferrell Gas Propane Distributor, will ensure the expansion of fueling stations, autogas stops and on-site filling stations paving the way for a smooth, trouble-free transition to propane fuel.

By converting your gas powered equipment to propane you can save money on fuel and improve the environment. Converting to propane can also prolong the life of your equipment with less maintenance costs. Ethanol fuels are causing havoc on all engines and propane offers a clean, green and cost saving fuel alternative.

Kits are available for residential and commercial use and include such equipment as lawn mowers, weed eaters, golf carts, wood splitters, pumps, ATVs, generators, tractors, leaf blowers, post hole diggers and MANY MORE!

Call Mary at Sweet Home RV Center at 541-367-4293 for more details or stop in Sweet Home RV Center, 4691 Hwy 20 East, Sweet Home, OR to learn more about converting any 1-45hp 4 cycle gasoline engine to propane fuel with this simple kit that can change your world.

THE ONLY THING RISING WILL BE YOUR MONEY

August 12, 2013 Sweet Home, OR

Rising gas prices. Rising taxes. Rising utility costs. Rising maintenance costs!

Whether you are an individual or business owner, wouldn't it be great to have something that will *lower* your expenses? Could you sleep better at night knowing you can reduce your fuel and maintenance costs by 30-40% while at the same time reducing hazardous exhaust emissions?

Call Mary at Sweet Home RV Center at 541-367-4293 for more details or stop in Sweet Home RV Center, 4691 Hwy 20 East, Sweet Home, OR to learn more about converting any 1-45hp 4 cycle gasoline engine to propane fuel with this simple kit that can change your world.
